Compact & Stylish Design

SLIM AND STYLISH DESIGN

Because of its slim, stylish design, the CL30 will blend beautifully into your home. The cabinet, with its wood grain finish, creates a warm, rich feeling. And with a choice of a Cherry or Rosewood finish, you will find it easy to coordinate the CL30 with your home decor.

27 cm

Three Pedals

SIMULATE ACOUSTIC PIANO

Three pedals allow you to simulate fine acoustic piano playing. The sustain pedal has half-pedal feature, which provides finer control of the dampening effect.

Fortissimo & Pianissimo

ADVANCED HAMMER ACTION IV

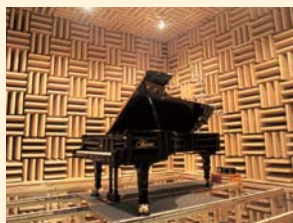

The Advanced Hammer Action IV with Acoustic Reaction technology (AR Technology) is KAWAI's most realistic graded-hammer action ever. The AR technology brings several technical improvements and innovations to the CL30's action. The result is an action that provides a more life-like feel and gives you more control of dynamic expression from pianissimo to fortissimo.

Essence of KAWAI Digital Pianos

HARMONIC IMAGING

We began with the world's finest concert grand... the handcrafted KAWAI EX Concert Piano. This piano is KAWAI's greatest concert grand and is used in many contests and concert halls all over the world. Using the anechoic chamber at our grand piano research facility, a team of sound specialists recorded the exceptionally rich sound of EX, creating a three dimensional map of the harmonic structure of the piano. Using sophisticated digital equipment, the KAWAI engineers were able to trace an extremely accurate sound map for each key. When playing the CL30, you will hear an amazing recreation of the EX Concert Piano's full range of tone and expression, along with perfectly smooth transitions from the softest note to the loudest.

Other Function

CONCERT MAGIC

Absolutely anyone can make real music with Concert Magic. Simply select your favorite piece from 40 preprogrammed songs (Children's songs, Christmas songs, American Classics, Classical selections, Special Occasions, International songs) and tap any of 88 keys with a steady rhythm and tempo.

Concert Magic is an ideal method for small children to develop a sense of rhythm. For those who may think it is too late to learn the keyboard, Concert Magic is a good first step to realising a lifelong dream. With Concert Magic, your CL30 piano can be enjoyed by anyone in the family, even those who have never touched a musical instrument before.
